PROFESSIONAL SUMMARY

Full Stack & AI/ML Engineer with hands-on experience in LangChain, LangGraph, RAG pipelines, FastAPI, and the MERN stack, seeking Software Engineering / AI Engineering internship roles.

EDUCATION

B.E. Computer Science and Engineering (III Year) 2024 – 2028 (Expected)
Sri Venkateswara College of Engineering (SVCE), Anna University CGPA: 8.38

SKILLS

AI / ML	LangChain, LangGraph, RAG, OpenAI API, Hugging Face, Prompt Engineering, Scikit-learn
Software Development	Data Structures & Algorithms, REST APIs, WebSockets, OOP, System Design
Full Stack	Node.js, Express.js, React.js, Next.js, FastAPI, TailwindCSS, MERN Stack
Databases	MySQL, MongoDB, Supabase, PostgreSQL, NeonDB
Tools & DevOps	Git, Docker, Postman, Vercel, Linux, DigitalOcean, Arduino / Embedded Systems
Languages	Python, JavaScript, TypeScript, SQL, Java, C, C++

EXPERIENCE

Research and Development Fellow <i>Vlog Innovations</i>	2025 – Present <i>Remote</i>
- Contributed to a government-funded project on InCent-LGD synthetic diamond milling, assembling and validating hardware machine components. - Conducted unit testing and operational evaluation for PCB milling machine hardware and manufacturing workflows. - Engineered software, firmware, and hardware integration for an Amazon Automated Tape Dispenser machine, leading core programming and testing.	
STEM Tutor & Event Coordinator <i>Engineering Monk</i>	2024 – Present <i>Chennai, India</i>
- Orchestrated an end-to-end Python Codeathon: created problem suites, configured an auto-evaluation pipeline, and authored Standard Operating Procedures (SOPs). - Coordinated technical logistics, corporate sponsorships, and live hosting for tech events engaging 200+ students.	
Freelance Full-Stack Developer <i>Independent</i>	2023 – Present <i>Remote</i>
- Designed and deployed scalable full-stack applications utilizing React/Next.js, Node.js, Express, MongoDB, and Tailwind-CSS. - Integrated custom REST APIs and third-party AI features to meet specific client requirements and optimize web performance.	

PROJECTS

- AI Negotiation Agent** (*LangGraph, LangChain, FastAPI*) — Built a multi-turn LLM agent featuring persistent memory and tool usage to execute autonomous negotiation strategies, counter-offers, and deal-closing logic. *Top 5 Finalist, Neuro Nexus Hackathon 2024.*

- **FDA Report Checker** (*LangChain, FastAPI, ChromaDB*) — Architected a Retrieval-Augmented Generation (RAG) pipeline ingesting FDA drug reports to resolve compliance queries with verifiable source citations at sub-2s P95 latency.
- **JurisMinds – Legal Chatbot** (*LangChain, Node.js, React*) — Developed an AI legal assistant interpreting IPC sections and retrieving relevant case precedents using dynamic vector search. *iCube-7.0 Hackathon*.
- **DEFENZERO** (*XGBoost, Random Forest, Python*) — Co-authored a published stacking ensemble machine learning framework for OTC drug risk classification and medication misuse detection. *IEEE Format / Published*.
- **Query Optimizer** (*Python, SQL*) — Built an automated SQL database query optimizer leveraging Constraint Satisfaction Problem (CSP) algorithms to minimize execution costs.
- **Trust Cart** (*Machine Learning, Smart Contracts, Web3*) — Engineered an e-commerce security system using ML to detect malicious attacks, smooth out transaction processing, and record audit trails on-chain.

LEADERSHIP & ACHIEVEMENTS

- **Published Research:** DEFENZERO (Ensemble ML for OTC Drug Risk Classification), submitted via Microsoft CMT.
- **Hackathon Achievements:** Ranked as Top 5 Finalist in Neuro Nexus Hackathon 2024; competed in 5+ competitive hackathons delivering prototypes under strict deadlines.
- **Elected Class Representative:** Consecutively elected by peers and faculty for 2 consecutive academic years to represent student operations.
- **Technical Club Leadership:** Served in key leadership and execution roles across multiple official campus technical clubs.
